EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony F. Bonner Jr. (Reg. No. 55,012) on November 19, 2008.

The application has been amended as follows:

Art Unit: 2191

In the Claims:

Please amend claims 1, 13 and 22 as follows:

Claim 1 (Currently Amended),

At line 1, before “method” insert computer-implemented

At line 8, before “generating” insert passing information to plug-in instruments when the function is called, wherein different plug-in instruments can be used at different times without re-instrumenting the classes of the function; loading an appropriate plug-in instrument object when instrumented class is initialized;

Claim 13 (Currently Amended),

At line 12, before “an interface” insert an information module for passing information to plug-in instruments when the function is called, wherein different plug-in instruments can be used at different times without re-instrumenting the classes of the function; a loading module for loading an appropriate plug-in instrument object when instrumented class is initialized;

Claim 22 (Currently Amended),

At line 2, after “comprising:” insert a processor;

At line 8, before “means for” insert means for passing information to plug-in instruments when the function is called, wherein different plug-in instruments can be used at different times without re-instrumenting the classes of the function; means for loading an appropriate plug-in instrument object when instrumented class is initialized;

- END -

REASONS FOR ALLOWANCE

8. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, passing information to plug-in instruments when the function is called, wherein different plug-in instruments can be used at different times without re-instrumenting the classes of the function; loading an appropriate plug-in instrument object when instrumented class is initialized as recited in independent claims 1, 13 and 22.

The closest cited prior arts, Oulu (U.S. 6,792,460), Boykin (US 2004/0153996), and Johnson, Mark "The Application Response Measurement (ARM) API, Version 2", 1997 (Art of Record, hereinafter "Johnson") teach a method of monitoring response time of function associated with a software component. However, Oulu (U.S. 6,792,460), Boykin (US 2004/0153996), and Johnson fail to teach passing information to plug-in instruments when the function is called, wherein different plug-in instruments can be used at different times without re-instrumenting the classes of the function; loading an appropriate plug-in instrument object when instrumented class is initialized as recited in independent claims 1, 13 and 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
